

Leksand karmstol

Leksand karmstol tillverkas i massiv björk. Stolen kan köpas obehandlad eller med valfri ytbehandling. I stompriset ingår en spånsits som är oklädd. Man kan också välja ramsits och klädsel. Vid större order (minst 50 stolar) kan träslag, specialmått m m väljas fritt.

Leksand armchair

Leksand armchair is manufactured in solid birch. The chair can be bought untreated or with any surface treatment. The armchair has more generous dimensions than the chair model in both seat depth and width. The basic price includes a chipboard seat without upholstery. You can also choose a wooden frame seat and upholstery. For larger orders (at least 50 chairs), the type of wood, special dimensions etc. can be chosen freely.

| sittdjup/seat depth | 41 cm |

Leksandsstolen som vi känner den i dag har sitt ursprung i början av 1900-talet men grundformen sträcker sig tillbaka till sent 1700-tal. Det engelska inflytandet under sengustaviansk tid influerade stolsmakarna att tillverka spjälstolar med svängda, närmast kvadratiska ryggar och avsmalnande, fyrkantiga ben.

The Leksand chair as we know it today has its origins in the early 1900s, but the basic form stretches back to the late 18th century. The English influence during the late Gustavian period influenced the chair makers to produce slatted chairs with curved, almost square backs and tapered, square legs.
